📁 Projects & Activities

SAC Website / SAC UX Case Study

UI/UX and front-end developer of this university event's website. UX Case Study can be found on Medium.

PortScanner

iOS app developed using Swift 4 and CocoaPods. Scans a range of ports from a given host and lets the user interact with some of them, using a console.

Snapchat Clone

Desktop app developed with Python 3 which intends to recreate Snapchat's main features.

Securita

Hackathon product developed with PHP and Javascript, using Mapbox's API.

UAQ Online Health Platform

Part of the team developing this health-related website to manage student's records. Focused on UI/UX and front-end development.
